**C1 Espresso**  
home of the world famous  
pneumatic sliders.

We'll deliver your meal to you through our pneumatic network at 100km/h. These are burgers from the future, delivered to the present from somewhere in the past (or something like that).

We acknowledge that this is the thin edge of the wedge, an unholy fusion of food and technology. It will herald a time when burgers, robots and chefs become self-aware and destroy all humans. We are also told these sliders taste pretty good.
